EDUCATION

University of Massachusetts Amherst | B.S. in Computer Science & Economics

Graduating: 2028

- Related Coursework: Calculus 1, 2, 3, Linear Algebra, Macro Economics, Micro Economics, Data Structures and Algorithms, Statistics & Probabilities | GPA 3.5

PROJECTS

UDash - Hack UMass XIII

November 2025

- Built with React + TypeScript + Google Gemini; added real-time order updates via web-scraping and integrated Google Maps API for dynamic location features.
- Engineered the onboarding pipeline reducing checkout flow by 30%; produced and presented a market-research deck with competitive analysis and adoption data.

Hiring Manager Pro - Hackathon HackHer 2026 (Winner)

February 2026

- Built a Unity (C#) hiring simulation using reinforcement learning concepts to generate candidates and evaluate hiring decisions across performance, bias, and team metrics.
- Created a statistical scoring system modeling team chemistry and hiring outcomes through weighted evaluation and iterative feedback.

Personal Portfolio - Bloomberg Style

November 2025

- Built a Bloomberg-style portfolio using Next.js 14, TypeScript, Tailwind, and Framer Motion, featuring a live market ticker, terminal boot-up animation, and interactive dashboard UI.
- Leveraged GitHub Copilot + Cursor for accelerated development and prompt-engineered UI refinements, producing a fully typed, optimized, 60fps, production-ready architecture.

WORK EXPERIENCE

Cornerstone Bank - Webster, MA

02/2025 - Present

Teller Intern -> Customer Relations Associate -> Customer Relations Specialist

- Manage client transactions and provide customer service, maintaining accuracy and compliance with banking regulations of KYC/AML tools.
- Gaining exposure to modern fintech workflows, digital banking systems, and customer-facing financial platforms.

LVLnity - Remote

02/2026 - Present

Lead Full-Stack Developer

- Develop full-stack features using Next.js, TypeScript, and Firebase, implementing authentication and real-time data systems.
- Collaborate remotely to ship product updates and improve performance through iterative development.

NoCam - Remote

07/2023 - 09/2023

Business Development Intern

- Contributed to strategic initiatives to enhance user engagement and platform growth.
- Supported a pre-seed raise of \$400,000, collaborating with advisors and mentors who helped me build skills in go-to-market strategy, competitive analysis, and stakeholder communication.

Project Destined - Remote

Private Equity Intern

- Selected for a competitive commercial real estate private equity training program; underwrote live multifamily deals using the Income, Sales Comparison, and Cost approaches to valuation.
- Built underwriting models projecting Net Operating Income, capitalization rates, and investment returns; presented a final investment recommendation to industry executives.

SKILLS
